

Listening Comprehension

Listen carefully while the teacher reads the following advertisement.

Sick of Motion Sickness?

Motion sickness can ruin a trip. But there's no need to let that happen. If you suffer from motion sickness, and don't like the drowsiness that can be a side effect of motion sickness remedies sold in pill form, then the **Accu-Brace** is for you. **Accu-Brace** is a soft nylon strip you wear around your wrist as comfortably as a watch strap. Combining ancient Chinese acupuncture principles with modern technology, it applies a mild electric charge - too faint to feel - to crucial pressure points on the wrist. In clinical studies, the **Accu-Brace** eliminated motion sickness altogether in nearly 80 percent of those who used it.

You can see the whole lesson from your teacher, please ask them to send it to you before the class.
