## Reading

Imagine a new chocolate that keeps you younger looking. It seems too good to be true, but a team of scientists believes they have invented anti-ageing chocolate. A laboratory working with the UK's Cambridge University has been working on a method to keep away wrinkles and keep the skin looking younger. It has called its new product 'Esthechoc'. This is a combination of the words 'esthetic' (meaning all things beautiful) and 'chocolate'. The new product is also called Cambridge Beauty Chocolate. The makers will start selling it from next month. The laboratory has not said anything about the price yet, but it is likely to be quite expensive. The lab hopes young, rich business executives will buy it.
