2. Which would you prefer: Mactini or Mactini nano?
3. Would you ever buy a Mactini or a Mactini nano if they were real?
4. Will the PC ever become obsolete in the future?

## Text Completion Quiz

**Instruction:** Listen to the recording again and then write the words you hear in the correct blank.

Hi, I'm John, and I'm gonna give you a guided tour of the latest \_\_\_\_\_ in computer technology: the Mactini - the smallest computer in the world. You've noticed it only has one key, but still performs all the functions of a regular keyboard. For instance, if I want to type the letter "a", I \_\_\_\_\_ it once. For the letter "z" I press it, you guessed it, 26 times. OK, how about punctuation? For a comma, I hold it down for 4 seconds, release it for 2, and then... ra ta ta tat! This and all the other combinations are explained in the \_\_\_\_\_. Mactini is also a fully \_\_\_\_\_ entertainment system. It's perfect for listening to music, watching movies, or even giving a business presentation. Since I started this \_\_\_\_\_, we've brought out a newer, smaller computer - the Mactini Nano, \_\_\_\_\_ this one... obsolete. Thanks for watching!
