

# The Weather

<p>A. Weather Predications</p> <p>Abby: If we cannot correctly forecast the weather for tomorrow, how can we talk about what's going to happen in 20 years or more?</p> <p>Your response...</p>	<p>B. Carbon dioxide is good for us!</p> <p>James Well, I'm a farmer and as we all learned in school, more CO2 is better for plants. I'm going to be a rich man with all the good this does my crops!</p> <p>Your response....</p>
<p>C. Questionable data</p> <p>Diane I heard that some climate data is not correct since it is from scientists who put their instruments in places like cities which are warmer than the rural areas.</p> <p>Your response.....</p>	<p>D. Small changes can't be very bad</p> <p>John If there's only been 1.3 degrees Fahrenheit warming over the last 100 years, why does it matter? Don't we have bigger problems to worry about right now?</p> <p>Your response...</p>

You can see the whole lesson from your teacher, please ask them to send it to you before the class.
