We all know life is full of strange occurrences we don't understand. We are often puzzled about people's different actions and about weird occurrences. Some of these mysteries disappear as we become older, but others become even stranger. These are some of life's greatest conundrums.

## Mystery 1

A woman walked into a shoe store and tried on a dozen pairs of shoes without finding a proper fit. Finally, the bored assistant told her, “Madam, we can't fit you because one of your feet is larger than the other.” The woman walked out of the store without buying anything.

In the next store, the fitting proved equally difficult. At last, the smiling assistant explained, “Madam, do you know that one of your feet is smaller than the other?”

The woman left the store happily with two new pairs of shoes under her arm.
